## Remote Work Has Changed Cybersecurity Permanently

Securing your headquarters and branch offices is challenging. Securing dozens, hundreds or even thousands of endpoints used by your staff working from home is practically impossible – until now.

Introducing Overwatch Managed Firewall

Bring true network security to your company's hybrid work environment with Overwatch Managed Firewall.

Our comprehensive solution provides visibility and threat protection at the network edge by combining:
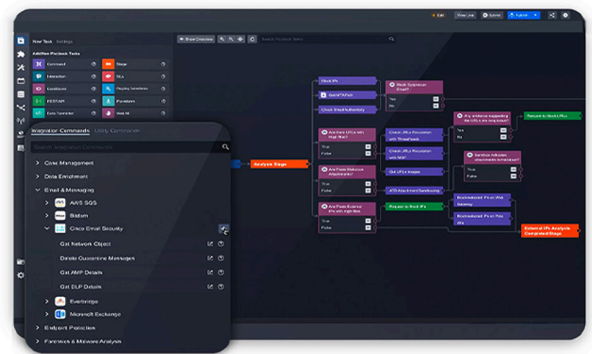

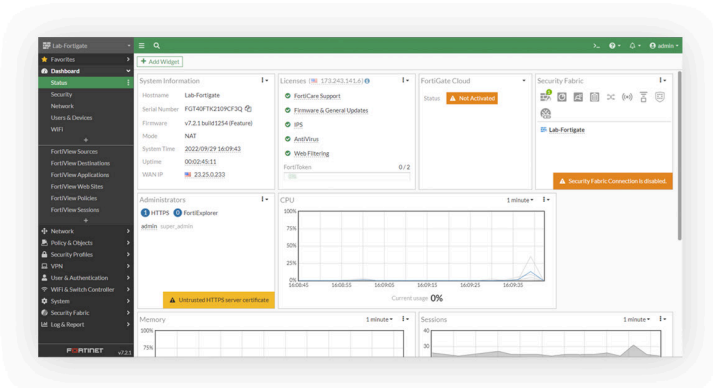

Universal Edge Appliances that merge a next-generation firewall and router with secure virtual private network (VPN), software-defined wide area network (SD-WAN) and 4G LTE wireless backup in a single solution deployed at office and remote sites.

Overwatch 24/7 Security Operations Center built on our AI-driven, SOAR-powered X Detection and Response (XDR) platform and managed by expert security analysts who monitor the Universal Edge Appliances and mitigate potential threats.

Secure Your Network from Edge to Edge

Whether you have 10 offices or 1,000 remote or mobile sites, Overwatch Managed Firewall delivers end-to-end and edge-to-edge security, managed 24/7 in an affordable as-a-service model.

Full Threat Protection
Stop ransomware, command-and-control attacks, and other hidden threats with SSL inspection and automated threat protection.

Layered Security
Concurrently run intrusion prevention, web and video filtering, and DNS security services to reduce costs and manage risks.

Damage Control
In the event of an inevitable breach, stop cyberthreats in their tracks by preventing lateral movement and minimizing the impact.

Coordinated Defense
Actionable threat intelligence is shared across the entire attack surface to execute a coordinated end-to-end defense.

Compliance Support
Manage security risk with support for regulations and standards including PCI- DSS, NIST, GDPR, HIPAA and more.

Overwatch Managed Cybersecurity Services Marketplace

Alongside the flagship Overwatch24/7 platform, High Wire delivers a range of subscription services for threat prevention, detection and response to meet the security and compliance requirements of organizations large and small.

Patch Management
SaaS Application Access Control
Overwatch Prevention Suite (OPS)
Vulnerability Management
Managed Firewall
Ransomware Kill Switch
Identity Access Management
Security Awareness Training
